

2010 | Campervan Scheme

In 2009/2010 the community voted for the introduction of a management plan for overnight parking of campervans and in 2010 a scheme which allows crofters to host up to 3 campervans per night on a designated area of their croft was established.

Before or when visitors arrive on Tiree they book into one of 14 designated croft sites and pay a nightly charge of £10 (£9 to the crofter and £1 to TRD Ltd for the booking service) and are issued with a permit. There are now 14 sites around the island and this scheme has proved very successful with 266 nights sold in 2010 and to date 254 nights sold in 2011.

The official campsite has also been extended and TRD has promoted the croft sites to people with on board toilet facilities, freeing up space within the campsite for campers and smaller campervans. This has successfully decreased the number of vehicles parking illegally on the machair overnight.
